

“

As a 100 person business that has grown from 15 employees five years ago, our IT needs have changed and been challenged. We have successfully utilized the services of Todd Williams and Right Guy IT for the past five years to help us cope with growth, internet security and changing technology.

Todd has been both helpful, competitive and flexible to our business needs. We are very lucky to have worked with Todd to develop our internal systems and provide a great value for the services provided.

Gordon Young

Managing Partner, Glov Enterprises

RIGHT  GUY IT

OUR SERVICES

Remote or on-site computer repair

Work through common computer problems you're experiencing with a repair technician.

Prefer more immediate support? Invite a technician to provide support through the internet remotely, a technician will take control of your system and work through your system problems while you sit back and get your other work done.

Wireless and wired networks

Whether it's a brand new network installation or improving an existing setup we will make your network work for you. Provide us a use case for your install and we'll suggest the best setup to fit your needs. We can examine your current wireless setup find the low reception points, find security vulnerabilities, and develop a solution to the shortcomings of the current configuration.

Access points

Not getting the type of speeds or connection strength at your home or office? We'll survey your existing install, identifying its weak points and see what solution we would need for a more efficient network.

Lease whole or partial VPNs.

Protect your privacy and security while using the internet through one of our Virtual Private Network services. Let us setup a Virtual Private Network to ensure your data is secure when working away from the home or office. Public networks at hotels, coffee shops and conventions are not always guaranteed to be secure. With the use of the VPN you don't have to hold back while on different networks, feel the safety of a secure private network.

Backup & Disaster Recovery

Usually its too late before it's a concern in most cases, but data backup shortcomings can have some devastating results. Whether it's a remote offsite backup your in need of, or an in-house setup that you have physical access to we can provide the perfect solution.

Cloud and IT Consulting

Describe to us your computing needs and we'll work with you to develop a solution to those needs. From an in-house server used to back up sensitive data, or a cloud storage solution of 871f-site to ensure the availability of your data we have it covered. Contact us to find out the benefits your business would have moving to the cloud.

Managed IT Services

Let us provide you with first-class technology "know-how. Our team of experts can provide you with a simple fix or manage all of your IT needs. Give us a call today at [248-509-0999](tel:248-509-0999) or email us at info@rightguyit.com.
